

Midband Ethernet

A HIGHLY RELIABLE TAILORED SCALABLE SOLUTION FOR LARGE CORPORATES AND GOVERNMENT DEPARTMENTS

About Midband Ethernet

Midband Ethernet is a fast, reliable, flexible broadband service with the same speeds for uploads and downloads (known as a symmetric service). Midband Ethernet is delivered over Copper (EOC) via multiple copper pairs bonded together, and speeds range from 2Mbps/2Mbps through to 80Mbps/80Mbps. Ethernet based Broadband is most suited to large corporates and government departments.

Broadband Solutions technologies come with a 99.95% Service Level Agreement and are presented to the customer at a 10/100 Ethernet port, making integration with existing Ethernet based equipment as simple as can be. No expensive fibre or ATM cards are required.

How do I know if Midband Ethernet is the right solution for me?

Availability of Midband Ethernet depends on a number of factors, including whether the necessary equipment is available at the relevant exchange, the length of cable to the nearest telephone exchange and the quality of the existing telephone service. It also depends on which upstream provider is supplying the service at that exchange. Broadband Solutions can work with you to identify which solution best meets your needs, now and in the future.

Requirements

With Midband Ethernet, availability is the only requirement. Broadband Solutions will preconfigure and deliver a preconfigured router to you (Plug & play).

In addition, we not only monitor your link 24/7, but we can also offer automatic redundancy on ADSL2+* to ensure that you never have to experience downtime.

* ADSL2+ redundancy available for additional monthly fee – please consult with our sales team for more information

Solution at a glance

- Midband Ethernet speeds are symmetric delivering the same speeds for uploads and downloads, and range from 2/2Mbps through to 80/80Mbps

- Static IP addresses
- Dedicated Account Manager
- Professional 24 x 7 Australian based help desk

Broadband Solutions

ABOUT US

Broadband Solutions is one of Australia's most successful business internet providers, offering innovative, tailored, reliable IP networks for Australian businesses. Founded in 2005, we experienced 85% growth over the last 3 years, and have been profitable for 9 years running. Australian-based and privately owned, Broadband Solutions is operated by an experienced team of industry veterans, with a dedicated business network and truly national coverage.

Our proven, reliable network carries the Internet and telephony traffic for some of Australia's largest companies and schools, as well as more than 85% of Australia's hotels.

Broadband Solutions' unique PABX system has been developed in-house using open source Asterisk technology. The system is capable of operating in the cloud or on-site and has already been rolled out over 1000 of our PABX systems to the SME and corporate sector.

Broadband Solutions' commitment to service excellence and customer support, built on significant investment in infrastructure, means we're the smart way to say hello – with an impressive network uptime of more than 99.95% for the last 8 years running. We take the stress out of managing telephony and internet networks.

For more information about how Broadband Solutions can tailor a solution to suit your business, call 1300 683 000 or visit broadbandsolutions.com.au

Their customer service is very, very good. It's probably the best I've experienced with any network IT vendor.

Kesh Nair, IT Project Architect,
Close the Loop

Broadband Solutions were astute and on time. They were also flexible, which is the most important thing with a new build.

Craig Simpson, Head of Hotel Technology,
Amalgamated Holding Limited

Broadband Solutions really took the stress out of the whole process and allowed us to become more productive, more quickly. Their commitment to customer service is outstanding and we would recommend them with absolutely no reservations to anyone looking for the best value in broadband and telephony.
