

ISDN

FLEXIBILITY, SCALABILITY, AND PEACE OF MIND

About ISDN

ISDN (Integrated Services Digital Network) is an international communications standard for sending data over digital telephone lines or normal telephone wires.

Broadband Solutions has a range of ISDN services to suit businesses of all sizes.

ISDN 2 can upgrade your normal (analogue) phone line to two digital lines and includes two telephone numbers. Each ISDN 2 service can carry up to two concurrent high quality digital phone calls.

ISDN 10/20/30 digital service is available in a minimum of 10 lines and can be expanded to suit large organisations. With an ISDN 10/20/30 service, concurrent high quality digital calls can be made or received, to the limit of the number of lines i.e. 10, 20 or 30. You may also connect your PABX and use a few of the lines for video conferencing.

How do I know if ISDN is the right solution for me?

ISDN is perfect if you currently have conventional analogue lines are looking to convert to digital telephony. ISDN increases the bandwidth of your lines, creates greater flexibility in your work environment, and offers enhanced functionality, allowing for PABX connection and use of the in-dial facility for all your incoming calls, including both voice and data.

Broadband Solutions can tailor an ISDN solution specific to the requirements of your business.

Requirements

You must have an ISDN capable PABX.

Solution at a glance

- Greater bandwidth than your normal (analogue) phone line, resulting in superior voice quality
- Flexible and Scalable – we consult with you to ensure your needs are addressed now and well into the future. We work to your plan and remain available to modify your service over time
- Peace of mind with our industry grade Service Level Agreement (SLA)
- Professional 24 x 7 Australian based help desk and business grade technical support

Broadband Solutions

ABOUT US

Broadband Solutions is one of Australia's most successful business internet providers, offering innovative, tailored, reliable IP networks for Australian businesses. Founded in 2005, we experienced 85% growth over the last 3 years, and have been profitable for 9 years running. Australian-based and privately owned, Broadband Solutions is operated by an experienced team of industry veterans, with a dedicated business network and truly national coverage.

Our proven, reliable network carries the Internet and telephony traffic for some of Australia's largest companies and schools, as well as more than 85% of Australia's hotels.

Broadband Solutions' SmartPABX™ system has been developed in-house using open source Asterisk technology. The system is capable of operating in the cloud or on-site and we have already rolled out over 1,000 of our PABX systems to the SME and Corporate sectors.

Broadband Solutions' commitment to service excellence and customer support, built on significant investment in infrastructure, means we're the smart way to say hello – with an impressive network uptime of more than 99.95% for the last 8 years running. We take the stress out of managing telephony and internet networks.

For more information about how Broadband Solutions can tailor a solution to suit your business, call 1300 683 000 or visit broadbandsolutions.com.au

Their customer service is very, very good. It's probably the best I've experienced with any network IT vendor.

Kesh Nair, IT Project Architect,
Close the Loop

Broadband Solutions were astute and on time. They were also flexible, which is the most important thing with a new build.

Craig Simpson, Head of Hotel Technology,
Amalgamated Holding Limited

Broadband Solutions really took the stress out of the whole process and allowed us to become more productive, more quickly. Their commitment to customer service is outstanding and we would recommend them with absolutely no reservations to anyone looking for the best value in broadband and telephony.
