

Microwave Broadband

AN ALTERNATIVE TO FIBRE FOR BUSINESS BROADBAND COMMUNICATIONS

About Microwave Broadband

Microwave is a point-to-point technology that can provide extremely reliable, high-capacity wireless communications. It supplies high rate symmetric speeds via an outdoor microwave transmitter that is installed on the roof of your premises and is a fixed address service (not mobile). It requires a clear line of site (LOS).

What are the benefits of Microwave Broadband?

As it uses exclusive, licensed frequency rather than an open frequency (such as that used by mobile carriers) microwave is able to use a much higher frequency band to deliver high-speed data services. It is a very reliable technology, and can provide an alternative to fibre where suited to the location.

Our Microwave services are available in speeds from 1/1Mbps up to 1000/1000Mbps. Fast installation times of 3 days are available, and speed upgrades can be processed same day (up to 1000/1000Mbps) with no changes to technology/hardware.

Requirements

Microwave is not available in all locations. Please contact our Sales on 1300 683 000 to confirm the availability at your location.

Solution at a glance

- Highly reliable technologies with a guaranteed 99.95% uptime
- Guaranteed speeds
- Flexible and Scalable – we consult with you to ensure your needs are addressed now and well into the future. We work to your plan and remain available to modify your service over time
- Fast 3 day installation
- Superfast, same day, upgrade capability
- Peace of mind with our industry grade Service Level Agreement (SLA)
- Static IP addresses
- Dedicated Account Manager
- Professional 24 x 7 Australian based help desk

Broadband Solutions

ABOUT US

Broadband Solutions is one of Australia's most successful business internet providers, offering innovative, tailored, reliable IP networks for Australian businesses. Founded in 2005, we experienced 85% growth over the last 3 years, and have been profitable for 9 years running. Australian-based and privately owned, Broadband Solutions is operated by an experienced team of industry veterans, with a dedicated business network and truly national coverage.

Our proven, reliable network carries the Internet and telephony traffic for some of Australia's largest companies and schools, as well as more than 85% of Australia's hotels.

Broadband Solutions' SmartPABX™ system has been developed in-house using open source Asterisk technology. The system is capable of operating in the cloud or on-site and we have already rolled out over 1,000 of our PABX systems to the SME and Corporate sectors.

Broadband Solutions' commitment to service excellence and customer support, built on significant investment in infrastructure, means we're the smart way to say hello – with an impressive network uptime of more than 99.95% for the last 8 years running. We take the stress out of managing telephony and internet networks.

For more information about how Broadband Solutions can tailor a solution to suit your business, call 1300 683 000 or visit broadbandsolutions.com.au

Their customer service is very, very good. It's probably the best I've experienced with any network IT vendor.

Kesh Nair, IT Project Architect,
Close the Loop

Broadband Solutions were astute and on time. They were also flexible, which is the most important thing with a new build.

Craig Simpson, Head of Hotel Technology,
Amalgamated Holding Limited

Broadband Solutions really took the stress out of the whole process and allowed us to become more productive, more quickly. Their commitment to customer service is outstanding and we would recommend them with absolutely no reservations to anyone looking for the best value in broadband and telephony.

Aaron Cox, ICT Coordinator
Kingswood Primary School
