

## THE NATIONAL BROADBAND NETWORK IS COMING

### *About the NBN*

The NBN is Australia's first national wholesale-only, open access communications network that is being built to bring high speed broadband and telephone services within the reach of all Australian premises.

The NBN will utilise four technologies: fibre, fibre-to-the node, fixed wireless and satellite. Within the next decade, the plan is for every home, school and workplace in the country to have access to the NBN.

### *What difference will the NBN make to my services?*

The increase in speed and quality of internet service delivered via the NBN will allow for greater work-life balance. Working from home will become an option for more people, education and health services will benefit, home entertainment will improve, and busy households on multiple devices will find the day-to-day easier and more efficient.

### *Requirements*

Everything up to the Network Termination Device (NTD) will be supplied by the NBN free of charge.

All you need to supply is a NBN compliant Ethernet router and anything else you may want installed in your premises, such as a WiFi router or cabling.

### *Solution at a glance*

- Highly reliable technologies with a guaranteed 99.95% uptime
- Speeds up to 100 Mbps download
- Peace of mind with our industry grade Service Level Agreement (SLA)
- Static IP address
- Dedicated Account Manager
- Professional 24 x 7 Australian based help desk

# Broadband Solutions

## ABOUT US

Broadband Solutions is one of Australia's most successful business internet providers, offering innovative, tailored, reliable IP networks for Australian businesses. Founded in 2005, we experienced 85% growth over the last 3 years, and have been profitable for 9 years running. Australian-based and privately owned, Broadband Solutions is operated by an experienced team of industry veterans, with a dedicated business network and truly national coverage.

Our proven, reliable network carries the Internet and telephony traffic for some of Australia's largest companies and schools, as well as more than 85% of Australia's hotels.

Broadband Solutions' SmartPABX™ system has been developed in-house using open source Asterisk technology. The system is capable of operating in the cloud or on-site and we have already rolled out over 1,000 of our PABX systems to the SME and Corporate sectors.

Broadband Solutions' commitment to service excellence and customer support, built on significant investment in infrastructure, means we're the smart way to say hello – with an impressive network uptime of more than 99.95% for the last 8 years running. We take the stress out of managing telephony and internet networks.

***For more information about how Broadband Solutions can tailor a solution to suit your business, call 1300 683 000 or visit [broadbandsolutions.com.au](http://broadbandsolutions.com.au)***

*Their customer service is very, very good. It's probably the best I've experienced with any network IT vendor.*

Kesh Nair, IT Project Architect,  
Close the Loop

*Broadband Solutions were astute and on time. They were also flexible, which is the most important thing with a new build.*

Craig Simpson, Head of Hotel Technology,  
Amalgamated Holding Limited

*Broadband Solutions really took the stress out of the whole process and allowed us to become more productive, more quickly. Their commitment to customer service is outstanding and we would recommend them with absolutely no reservations to anyone looking for the best value in broadband and telephony.*

Aaron Cox, ICT Coordinator  
Kingswood Primary School
