

Expansion into New Zealand, Singapore and the United States for Broadband Solutions

23 March 2015: Broadband Solutions, one of Australia's most reliable and fast growing business telecommunications providers, has today announced their imminent expansion into New Zealand, the United States, and Singapore.

Over the next few weeks, the company will activate a new Point of Presence (PoP) in New Zealand. PoPs in the United States and Singapore will go online in the coming months.

"This is a game changing moment for Broadband Solutions and our customers. Over the past 10 years we have built one of Australia's most reliable business telecommunication networks. Now we are ready to help Australian businesses launch onto the global stage," said Sam Bashiry, Managing Director of Broadband Solutions.

Like their Australian services, Broadband Solutions' international offerings will be carrier neutral, meaning clients are able to move between network carriers as more affordable or efficient services become available.

"We are committed to providing our customers with the most effective solution at any location, so that means we have to be capable of providing a choice of networks and technologies. Being carrier neutral means we can give our customers the best access at the best price," said Mr. Bashiry.

The company's recent partnerships with major cloud vendors mean that customers will also have international access to the latest in IaaS and SaaS solutions.

Businesses who wish to enquire about Internet connectivity, Private MPLS services, or WAN solutions at any of the new international locations, should contact their existing Broadband Solutions Account Manager or send an enquiry to sales@broadbandsolutions.com.au.

About Broadband Solutions

Broadband Solutions is one of Australia's most successful business internet providers, offering innovative, tailored, reliable IP networks for Australian businesses. Founded in 2005, with just \$1000, the company now boasts over \$10 million in annual revenue, has experienced 83% growth over the last 3 years, and has been profitable for 9 years running.
