

Broadband Solutions Brings Business NBN to Prospect

- Business-grade NBN services now available for Prospect businesses and schools
- Improved speed, security and efficiency will help businesses expand customer base

27 April 2015: Broadband Solutions, one of Australia's most reliable and fast growing Business Internet Providers, is now offering business-grade NBN services in Prospect. The services are available anywhere with NBN access and offer faster upload speeds and premium Service Level Agreements (SLAs).

"Business-grade plans will help Prospect businesses take advantage of the NBN. Fast speeds and service packaging will help owners operate more efficiently and improve competitiveness," said Sam Bashiry, Managing Director of Broadband Solutions.

With hyper-fast upload and download speeds, businesses will be able to replace all their phone and Internet lines with a single connection that can provide Internet access, video conferencing, and voice services.

"Putting aside political and technical debates, the arrival of the NBN is a very exciting time for Prospect. It will help reinvigorate the area as a prosperous regional centre by allowing businesses to seamlessly service customers all over the country and the world," said Mr. Bashiry.

Broadband Solutions is Australian owned and operated, and provides all customers with a dedicated Account Manager and 24/7 Australian based support.

Additionally, businesses that operate in multiple locations can take advantage of Broadband Solution's national network, whether or not all locations have NBN access. By doing so, businesses will be able to reduce overall network costs; improve connection quality and speed; and ensure a premium level of security.

"By bundling multiple sites together with Broadband Solutions, all internal traffic will run through our private network, improving speed and security. Combining this with the improved efficiency of multi-site VoIP, we've seen businesses take advantage of significant cost savings," said Mr. Bashiry.

To find out whether the services are available in your area, visit [Broadband Solution's NBN Availability Tool](#) or contact Broadband Solutions today by phone 1300 683 000 or email sales@broadbandsolutions.com.au.
